Liquid Wrench Offers a Low Cal Six Pack

Walking through the parts store the other day, on the way to grab our usual basket full of Liquid Wrench for all those rusty nuts and bolts we deal with, and I see a six pack. No, my dreams of being able to buy beer at an auto parts store had not come true. This was a 6-pack of magical automotive juices -- or so they claimed. But do I need six different products to satisfy my lubricating needs? Always one to experiment, I decided to buy the Liquid Wrench Six-Pack to see if it was a waste or a wonder.
