## PRODUCT NEWS

### DIY and Dry

**L**iquid Wrench Dry Lubricant, part of the new Liquid Wrench line for do-it-yourselfers, is designed to go on wet and dry quickly to a white, ceramic-reinforced Cerflon lubricant powder. It is safe, long-lasting, non-staining and has low residual odor, says the company. Use it to reduce friction, protect against wear, quiet squeaks and prolong life. It's available in multiple product sizes as well as a dropper bottle for controlled indoor application. Suggested uses are on cabinet hardware, closet rollers, bifold door pivots, locks, folding knives, drawer guides, sliding doors and interior door hinges and windows.
