### Liquid Wrench Introduces the Ultimate Six Pack

The Liquid Wrench Six Pack consists of specialty spray penetrants and lubricants — six of the company's most popular products in one convenient package. The Liquid Wrench Six Pack features Liquid Wrench Penetrating Oil; Liquid Wrench White Lithium Grease, which is an ideal all-weather application because it will not freeze or melt and provides a long-lasting, heavy-duty grease coat for joints, hinges and connections; and Liquid Wrench Chain Lubricant, which stays in place to lubricate and prevent corrosion on fast-moving chains or wire cables. Also in the six pack is Liquid Wrench Silicone Spray, which provides super slippery protection in a clear,

non-staining film to prevent rust and corrosion, protects rubber gaskets around car doors and prevents them from sticking in cold temperatures. The Liquid Wrench Dry Lubricant and Liquid Wrench Lubricating Oil finish off the six pack.
